THE
THIRTY-FIFTH ANNUAL REPORT
OF THE
BOARD OF DIRECTORS OF CITY TRUSTS.

To the Councils of the City of Philadelphia, the Board of Appointment composed of the Judges of the Courts of Common Pleas of the County of Philadelphia, and the Legislature of the Commonwealth of Pennsylvania:

GENTLEMEN:

IN compliance with the Act of Assembly entitled "A Further Supplement to an Act entitled 'An Act to Incorporate the City of Philadelphia, approved the second day of February, one thousand eight hundred and fifty-four,' creating a Board called Directors of City Trusts," approved June 30th, 1869, the Board of Directors of City Trusts respectfully present this the Thirty-fifth Annual Report of the several Trusts under their administration, for the year 1904.

As noted on page 9 of the report for the year 1903, the Hon. William Potter was, on January 4th, 1904, appointed a member of the Board to fill the vacancy then existing because of the death of Mr. William L. Elkins.

No other changes have occurred in the membership of the Board during the year.

The several trusts under our care have had careful attention by the executive officers and the employes of the Board, who have discharged their duties with fidelity and zeal.

The reports appended to this summary of the operations of the year show a more than usually satisfactory condition of affairs, and they should have your careful examination.

The report of the PRESIDENT OF GIRARD COLLEGE (*Appendix D*), with the reports of the other officers submitted through him, gives in great detail a statement of the work of the year and of the condition of that Institution at its close.

There were no deaths either in the faculty or in the staff of the Household officers of the College, and only the following

Resignations:

Miss Laura Mae Benson.....Teacher in 1st Form.

“ C. Jessica J. Donnelly..... “ “ 2d “

“ Mary D. Ware..... “ “ 3d “

Miss Ware had been in the service of the College since January 1st, 1880, and had discharged her duties as teacher with credit to herself and to the satisfaction of the Board.

The vacancies caused by these resignations were filled by the appointment of:

Miss M. Jennie Dome,

“ Sophie R. Worthington, and

“ Alice B. Ragotzky.

Dr. Howard G. Fretz resigned as Resident Physician. Dr. Sidney J. Repplier filled the vacancy temporarily but satisfactorily until the close of the year, when Dr. M. F. Sewall was appointed.

Miss Mary McBride resigned as Governess and Miss Lena Lau was appointed to the place.

Lieut.-Col. H. G. Cavanaugh, U. S. A., retired, was at his own request, relieved as Professor of Military Science and Tactics, and no detail has as yet been made to fill the vacancy.

During the year Mr. George Huster, Head Gardener of the College, died, after thirty-two years of service. Mr. Edwin V. Lonsdale was appointed to the vacancy.

Mr. Frank Sauer, Superintendent of the Shoe Department, for eight years, also died and Mr. George Kramer was appointed to the place.

The revised course of study, in operation since the Fall term, has proved satisfactory, and the required new text books have had general approval. More familiarity with the details of the new course will no doubt result in even greater proficiency of attainment by the scholars.

Under the new course, two classes are graduated in each year, and the commencement day exercises are always interesting. In addition to the addresses and essays by the graduates, admirable addresses of advice and encouragement were made by Judge G. Harry Davis, and by William H. Staake, Esq., at the January and June commencements.

Instruction in Manual Training, in Trade Teaching, and in "Sloyd," has received the usual careful attention.

The Manual Training School was honored by a visit of the members of the Eastern Manual Training Association, which held its Annual Convention in Philadelphia in the Summer of 1904.

A reception was tendered to the members of the Convention on July 7th, 1904, who were much pleased with their visit, and expressed high appreciation of our schools and their methods.

Other visitors, notably several from foreign countries to the St. Louis Exposition, honored the schools during the year, and it is gratifying to mention their commendation of our work.

Sixty-five boys have had the benefit of Trade Teaching during the three years that this course has been in operation, instruction having been given as follows:

Metal working.....	20
Electrical mechanics.....	18
Pattern making.....	14
Foundry.....	10
Plumbing.....	<u>3</u>
Total.....	65

Thirty-one, all but five of them having taken the full course, went out to employment.

Twenty-two are engaged in mechanical pursuits and three are engaged as clerks.

The others have varied employment or their occupation at this time is unknown.

The new plans for Physical Training are described by the President in great detail, and the work of the Instructor produces excellent results in the general bearing and the physical condition of the scholars.

The Librarian reports that 338 volumes and 333 pamphlets were added to the principal library of the College.

During the year, 9968 books were issued to 4008 officers and teachers and 6423 pupils. Of these issues, 3168 were periodicals, and 4881 works of fiction.

The books issued classify as follows:

General works.....	145
Philosophy.....	93
Religion.....	31
Science.....	349
Arts.....	153
Literature.....	322
History.....	189
Biography.....	345
Travels.....	269
Periodicals.....	3,191
Fiction.....	<u>4,881</u>
Total.....	9,968

There is no detailed record of the use of the 31 section-room libraries containing more than 16,000 volumes.

The Encampment of the Battalion of Cadets was held as in previous years, at Island Heights, N. J., from July 6th to 15th, both inclusive.

Lieut.-Col. Chas. Humphreys, U. S. A., was the inspecting officer. His report is highly complimentary to the officers and privates of the Battalion.

All but 337 of the boys had Summer vacations of eight weeks or less, at the encampment of the Battalion or with their friends. Those remaining at the College during the whole Summer had the usual picnics and other outings.

The "Days," anniversary and others, celebrated during the year are as follows:

New Year's Day,	Memorial Day,
Lincoln's Birthday,	Independence Day,
Washington's Birthday,	Arbor Day,
Founder's Day,	Thanksgiving Day.

The President's report of these celebrations shows that the exercises are appropriate to the particular occasion, and are always interesting and profitable.

The most important of these days is, of course, Founder's Day, on May 20th, the anniversary of Stephen Girard's birth. The address at last year's celebration was made by Hon. Stewart L. Woodford, of Brooklyn, and Lieut.-Gen. Adna R. Chaffee, U. S. A., was the reviewing officer.

More than 1000 of our graduates and many more thousands of the friends of the College crowded the buildings and the grounds.

The paragraph in the report of the President referring to the squirrels, is so novel and so interesting that it is reprinted here in full:

"A colony of gray squirrels, introduced last Spring, have become a pleasant feature of the College grounds. They were purchased in two instalments, the first of which was paid for by the boys and the second by the

teachers and officers. The little quadrupeds seem to have won all hearts. They have received nothing but kindness from the boys, and have at the same time become a source of entertainment and an interesting study of animal life on the part of our adult population. No one thinks of doing them any harm, and such is the feeling of tenderness for them that should they receive abuse from any source, every boy in the College would rally to their defense. To say nothing of the positive pleasure they have afforded us all, they have taught a most valuable lesson in kindness to dumb animals."

As usual during the winter, a course of lectures has again been given during the season of 1904 and 1905.

These have been selected with great care, and adapted to the peculiar fitness and ages of the students of the College. They have been given under the immediate supervision of a Committee of the Board of Directors and have proven both entertaining and instructive.

The buildings and grounds are reported in good condition.

During the year a granolithic walk was laid on the play ground for the boys in No. 7 building.

The chapel was renovated and painted.

During the coming year other repairs and improvements will have attention.

The report of the PHYSICIANS is one of statistics only, and these are gratifying:

The total number of cases treated was.....	<u>2,356</u>
A decrease from the previous year of.....	<u>212</u>

The following were the deaths during 1904:

Meningitis	1
Tuberculous meningitis	1
Acute nephritis.....	1

— 3

In 1903 six died.

There were operations for

Appendicitis 1

Erythema 1

Both were successful.

These figures show that the Infirmary and the sanitary arrangements of the College, as well as the medical service, are of the best.

The report of the STEWARD gives in detail the provisions furnished and a statement of repairs to buildings and grounds.

The average cost of subsistence per capita of pupils, \$75.39, includes that furnished the officers and employes at the College tables, but is calculated only upon the average number of pupils, 1516.

The total cost, \$114,295.95, includes the subsistence of the Summer Encampment and the collation to the Alumni on Founder's Day. Compared with the preceding year there is an increase of \$941.17, caused by the increased price of provisions.

The population of the College during the year 1904 was as follows:

Number of pupils January 1st, 1904.....	1,486	
Admitted during the year.....	245	
		1,731
During the year there were		
College indentures canceled to enable boys to accept employment.....	204	
Returned to mothers and friends, transferred to other institutions, &c.....	22	
Left at eighteen years of age.....	13	
Died.....	3	
		242
Number of pupils December 31st, 1904.....	1,489	
Officers { Instruction.....	66	
Household.....	48	
		114
Employés of household.....	273	
		387
Total, December 31st, 1904.....	1,876	

The following table shows the number of applicants registered for admission into Girard College, and the number of boys in the College on December 31st, 1904, born in the several counties of Pennsylvania:

County.	On the List of Applicants.	In the College.	County.	On the List of Applicants.	In the College.
Adams		3	McKean	1	
Allegheny	7	6	Mifflin	5	6
Bedford		4	Monroe	1	3
Berks	10	28	Montgomery	25	53
Blair	12	20	Montour	1	4
Bradford	1	5	Northampton	6	13
Bucks	6	22	Northumberland	14	27
Butler		1	Perry	1	1
Cambria	1	5	Schuylkill	47	77
Cameron	2	1	Snyder	1	
Carbon	3	9	Somerset		1
Centre	5	10	Sullivan		2
Chester	17	35	Susquehanna	6	7
Clearfield	7	14	Tioga	2	2
Clinton	7	21	Union		1
Columbia	11	14	Venango	1	1
Crawford	3	6	Warren		1
Cumberland	7	10	Washington	1	2
Dauphin	10	29	Wayne	3	5
Delaware	21	50	Westmoreland	4	2
Elk	1	3	Wyoming	1	1
Erie	4	1	York	3	1
Fayette		1			
Forest	2			368	668
Franklin	1	3	Philadelphia (out-		
Huntingdon	7	5	side of Old City),	377	707
Indiana	3	4	Old City of Phila-		
Jefferson	2	16	delphia	3	114
Juniata	1				
Lackawanna	23	27		748	1,489
Lancaster	10	23	Outside of the State		
Lebanon	2	11	of Pennsylvania	12	. . .
Lehigh	2	4			
Luzerne	45	53		760	1,489
Lycoming	12	14			

In the number registered for admission there is an increase
from Philadelphia of 24
and a decrease from other parts of Pennsylvania, &c., of 13
Total increase 11

There are pupils in the College, or applicants registered for admission, from 58 out of the 67 counties of the State.

The SUPERINTENDENT OF ADMISSION AND INDENTURES reports 245 admissions and 239 dismissals of pupils from the Girard College; also a summary of the present condition and the immediate future prospects of the young men honorably discharged from the College during the years 1899 to 1904.

These reports are generally satisfactory, and they evidence the fact that the education received at the College contributes to make better citizens of those received as wards of Mr. Girard's bounty.

The report of the SUPERINTENDENT OF GIRARD ESTATES (*Appendix A*) shows the following receipts:

	Gross.	Net.
From Real Estate within the City, \$749,979 80		\$412,902 06
Stocks, Bonds, &c.....	205,977 71	205,627 42
Total.....	\$955,977 58	\$618,529 48
From same sources in 1903.....	925,897 63	582,950 30
an increase of.....	\$30,079 95	\$35,579 18

The continued increase, both of gross and net, in income is caused by the increase of rental values of the properties located on Chestnut Street.

Decreased expenditures in the operation of the Third Street Power House have also contributed to these gratifying results.

The net increase would have been still greater but for the increase in payment for taxes of \$18,822.81 over the preceding year, and of \$43,234.21 over the year 1902, the increase in assessments being \$4,283,850. During the ten years preceding 1904, the assessment was more than doubled.

The income from the properties on Front Street, on Delaware Avenue, and at Fifth and Brown Streets is less than in the year 1903.

During the year the Girard Estate paid the city:	
for water rents.....	\$6,485 15
for taxes.....	\$156,685 50
a decrease in water rents of.....	\$13 14
and an increase in taxes of.....	\$18,822 81

The only work, beyond the ordinary repairs, in the improvement of real estate, has been the paving with asphalt of the private street running from Eleventh to Twelfth, north of Chestnut Street.

Several of the stores on Chestnut Street have been equipped with steam heating apparatus and electric appliances, to receive power and current from the power plant in the Stephen Girard Building.

Work on the projected row of houses at Seventeenth and Porter Streets was postponed because of the high price of building material and the increase in mechanics' wages.

Girard Park at Twenty-first and Porter Streets is completed and ready for use by the public. The location is in advance of building operations and of street improvements but it is expected that the tendency of population southward will soon bring many visitors to this pleasure ground. The Park is not only a credit to the gardeners who finished the work, but also a spot of historic interest because of the dwelling house and farm buildings once used by Stephen Girard as his summer residence.

The whole of this work has been prepared and, with the four acres of ground, set apart for public use without cost to the taxpayers.

Shunk Street between Twentieth and Twenty-second Streets, and Twenty-first Street north of Shunk Street have been graded and curbed at the expense of the Girard Estate.

The "squaring" of property lines with adjoining owners, made necessary by the streets running to the southwest instead of north and south as in other parts of the city, is progressing satisfactorily.

Mr. Samuel C. Dinsmore, the Chief Engineer of the Stephen Girard Building since 1897, and subsequently the Engineer in charge of all the Girard Estate property, in which steam or electric power was used, died on March 27th, 1904.

Mr. Dinsmore was a faithful and an efficient officer, and the success of the work in this department is due to his ability, good judgment, and sterling integrity.

From a large list of applicants, Mr. Robert Hughes was selected to fill the vacancy caused by Mr. Dinsmore's death.

IN THE FIRE INSURANCE FUND

The assets amount to.....	<u>\$52,129 75</u>
and the amount at risk to.....	<u>\$1,017,350 00</u>
an increase in assets of.....	<u>\$3,808 55</u>

During the year there were three fires covered by this fund, and one covered by policies in one of the local fire insurance companies.

The loss paid by the Insurance Company amounted to \$1920.75, and the losses to the Insurance Fund amounted to \$135.17.

The investments in stocks and bonds for the RESIDUARY FUND of the Girard Estate

now amount to.....	<u>\$5,626,050 00</u>
an increase of.....	<u>\$612,870 01</u>
The net income was.....	<u>\$196,416 84</u>

Work in classifying, translating, and indexing the large number of letters, &c., left by Mr. Girard, continues.

Work on the letters received, more than 32,000, has been completed to the year 1832, the year when Mr. Girard died.

Translation of letters received to 1807, and of letters written to 1797, is finished, covering nearly 2,000,000 words.

It is expected that the work of cleaning, repairing, and pressing will be completed during the year 1905, but that the translation and indexing cannot be finished within that time.

The improvement of Delaware Avenue between Vine and South Streets is finally completed.

The cost of the whole work, including the widening of the roadway to 150 feet, the construction of granolithic bulkheads, the grading and paving of the roadway with Belgian block upon a concrete base, and of the sidewalks with granolithic flagstones, was \$787,242.76, the total amount being paid from the income of the fund bequeathed by Mr. Girard, and which remains at the original sum of \$500,000.

The improvement is of such advantage to the commerce and to the general trade of Philadelphia, that it is hoped that its authorities may soon be able to extend it north and south from the points named by Mr. Girard as the limits of his bounty.

In addition to the cost of this work, large sums have been expended annually for policing, cleaning, lighting, and keeping in general good order this part of Delaware Avenue, and of Water Street, and Front Street between the points named.

The work of removing wooden buildings within the limits of the old city of Philadelphia is also approaching completion, only two such structures having been paid for from this fund during the past year.

The principal of this fund continues at.....	\$500,000 00
and the accumulated income is.....	\$24,802. 36
The income from investments was in 1904.....	\$26,536 03
and the expenditures, other than for investments, were.....	\$149,739 42
The expenditures included for widening Delaware Avenue	\$129,933 03

The report of the SUPERINTENDENT (*Appendix A*), with the report of the ENGINEER OF THE GIRARD ESTATE IN SCHUYLKILL AND COLUMBIA COUNTIES (*Appendix B*), and the appended reports, give a full account of the important operations in connection with the Girard lands in these counties.

The total receipts from real estate outside the city of Philadelphia were:—

	Gross.	Net.
In 1904.....	\$551,183.79	\$484,480.54
In 1903.....	462,377.21	393,933.75
Increase.....	\$88,806.58	\$90,546.79

	Tons.	Cwt.
Shipments of coal, 1904.....	1,656,018	1
“ “ 1903.....	1,515,213	14
Increase.....	140,804	7

The total coal shipped from the Girard Lands in 1904 was.....1,656,018 tons 1 cwt.
 To this should be added coal used for mining purposes..... 201,290 “ — “
 showing an output of..... 1,857,308 “ 1 “

It will be noted that the increase in the shipment of coal over the shipments of 1903 is less than 10%, while the increase in net receipts is nearly 25%. This arises from the increase of nearly 5% in the quantity of large coal shipped and the increase in the royalties paid on the smaller sizes under the readjustment of rates based upon the selling prices of these sizes during the preceding year.

In 1903 the royalty on all coal shipped

was.....	\$.26.44 per ton
and in 1904 it was.....	.31.59 " "
an increase of.....	<u>.05.15 " "</u>

The total shipments during 1904 were the greatest of any year in the history of mining

from the Girard lands.....	<u>1,656,018 Tons</u>
----------------------------	-----------------------

the total shipments in the state of Pennsylvania being.....	<u>57,492,522 " "</u>
---	-----------------------

a decrease over the previous year of.....	<u>1,870,309 " "</u>
---	----------------------

The statements of shipments in the United States, bituminous and anthracite, in 1904 are not yet completed; but in 1903 they were.....	<u>319,068,229 " "</u>
--	------------------------

Two leases for the mining of small bodies of coal, difficult to reach from former openings and hence unmined, were made during the year, increasing the mining leases to 13 and, with the 2 washery leases, the total of operations, to 15.

Nine of these increased their shipments.....	<u>313,636 tons.</u>
--	----------------------

and six reduced theirs.....	<u>172,832 " "</u>
-----------------------------	--------------------

With all the collieries and washeries in good condition for increased shipment and with apparently a large demand and a ready market for coal, it is expected that the production of 1905 will greatly exceed even the large shipments of last year.

No material enlargement of the shipping facilities above ground were made, but the underground workings were extended by the driving of 7.2 miles of new gangway, with the necessary chutes and breasts for the working of the coal.

Only 1 mine fire occurred during the year and that of a trifling character. The damage caused by these fires is apt to be very great and the precautions taken in late years to prevent fires have greatly decreased their number and extent.

The percentage of the different sizes of coal shipped compared with previous years, is as follows:—

Year.	Large. Per cent.	Chestnut. Per cent.	Pea. Per cent.	Buckwheat. Per cent.	Rice. Per cent.	Barley. Per cent.	Culm. Per cent.	Per Cent.
1863 .	90.00	10.00	100
1867 .	87.49	12.17	.34	100
1878 .	77.22	12.52	10.19	.07	100
1895 .	50.64	20.31	11.51	16.54	1.00	100
1902 .	30.67	19.09	15.47	23.49	10.25	.82	.21	100
1903 .	33.00	17.48	13.87	21.61	12.56	1.47	.01	100
1904 .	37.35	17.77	13.30	17.45	12.24	1.88	.01	100

The decrease in the percentage of the small sizes no doubt arises from the comparative decrease in the price of bituminous coal and the consequent increase in the use of that coal for steam purposes.

The tree plantations received the customary care to protect them from damage by forest fires, but there have been no additional plantings. The trees show satisfactory growth, but it will be many years before they become of commercial value.

The 7 farms in the Catawissa Valley are occupied, but very little revenue is derived from them and none whatever from the more than 11,000 acres of land containing no coal and which, with the other 4200 acres of coal lands, constitute the Girard Estate in Schuylkill and in Columbia Counties.

This part of the Commonwealth is a mining region and farming and timber growing fail to produce large income to the land owners.

The total income from the cutting of timber, from rental of farms, and from the sale of stone, sand, &c., was about \$11,000.

For the use of the water pipe lines by the Girard Water Company the Estate received a rental of \$15,000. The length of pipe laid is 54,661 feet.

The tax levied upon the lands of the Girard Estate amounted to.....	\$47,234 38
an increase over 1903 of.....	\$3,640 34
or more than 8 per cent.	

The rate of taxation varies but little, but the assessed valuations are steadily growing.

In the opinion of the assessors, the lands appear to be increasing in value as steadily as their valuable contents—the coal—decrease in quantity.

The report of the GIRARD WATER COMPANY (*Appendix C*) gives in detail the quantities of water supplied to consumers and the receipts therefor.

The increased consumption of water for mining purposes was but 130,000 gallons, a comparative decrease over the year 1903 of 2%; but the increase for domestic purposes was 10,000,000 gallons, a comparative increase of 2%.

The following tables give interesting comparisons with the figures for the year 1903:

The total consumption was 382,970,724 gallons.

There were used at 14				
collieries and washeries...	263,260,676	galls. or	69	per cent.
by 3 railroads	15,533,716	" "	4	" "
and for domestic purposes				
by 8 lessees.....	104,176,332	" "	27	" "
	<u> </u>		<u> </u>	
Total.....	382,970,724	" "	100	" "
	<u> </u>		<u> </u>	

an increase of..... 11,246,601 gallons over the year 1903.

The smallest consumption was in June 27,887,608 gallons.

the largest was in December..... 35,268,200 "

In 1884, the first year of the Company's existence, the consumption was..... 92,848,023 "

The total quantity of water supplied to its customers in 21 years was 4,254,491,041 "

The weather records kept at the reservoirs of the Company show a total precipitation for the twelve months ending December 31st, 1904, of..... 52.51 inches
Average for 17 years preceding..... 57.45 "

A deficiency of..... 4.94 "

The greatest precipitation was in September 6.50 "

and the least " " " November.... 2.55 "

There was rain or snow fall on..... 148 days,
the greatest being in December..... 16 "

The total snow fall was..... 102.25 inches.

Water is furnished to the small consumers at the rate of 10 cents per 1000 gallons, and to the collieries and other large consumers at a minimum charge of \$50 per month for 1,000,000 gallons or less, and at 10 cents per 1000 gallons for all used in excess of 1,000,000 gallons.

The average receipts during 1904

were.....	8.28 cents per 1,000 gallons
and for 1903.....	8.60 " " "

The total receipts of the Company were:

for Water-rents.....	\$30,923 35	
" Ice-cutting Privileges.....	236 92	
Miscellaneous.....	214 83	
	<hr/>	\$31,375 10
A decrease of.....	<u>\$1,155 67</u>	

The total expenditures were:

Rent of Pipe-lines.....	\$15,000 00	
Repairs to houses and stables.....	152 30	
" " reservoirs.....	26 15	
General improvements.....	3,628 06	
Stationery and miscellaneous ex- penses.....	284 10	
Taxes.....	1,100 00	
Salaries.....	960 00	
Dividends.....	9,975 00	
Forestry.....	156 83	
	<hr/>	31,282 44
An increase of.....	<u>\$1,378 16</u>	
Excess of receipts.....		<u>\$99 66</u>

The item of expenditures for general improvements includes the extension for 6,158 feet of the wall enclosing the watershed west of the Ringtown Road, making the length now in place about 5 miles.

It is proper again to report that all the profits of the Water Company inure to the benefit of the Girard Estate, which owns all the stock, except three shares, which latter issue was required by law to effect a company organization, and to add that such a Corporation was necessary to prevent a diversion of this water supply to the profit of a private company, and to the detriment of the tenants of the Girard Estate.

The report of the SUPERINTENDENT OF MINOR TRUSTS (*Appendix F*) contains in condensed form the statements of the financial and statistical accounts of 38 Trusts, classified as follows:

Hospitals.....	4
House of Correction and Almshouse.....	3
Schools.....	4
Library.....	1
Medals.....	3
Loans to artificers.....	2
Fuel and food.....	15
Miscellaneous.....	6
	<u>38</u>

The increase of three in the number of these trusts arises under the will of Dr. Bushrod Washington James, who died on January 6th, 1903, bequeathing his estate to the City of Philadelphia for the support of the Bushrod Washington James Eye and Ear Institute; the support of the Bushrod Library, and a smaller fund for the care of his burial lot in Monument Cemetery.

The several sums bequeathed for the two chief objects named in the will are at this time altogether insufficient for this purpose, and it will be many years before the principal with its accumulation of income will amount to enough for the support of the two institutions named by the testator.

For this purpose, and with the approval of the Court, the funds paid to us by the Executor have been invested and the real estate offered for rent.

The Capital accounts, the current receipts and expenditures, and the receipts from legacies, donations, &c., summarize as follows:

Total invested capital of all the Minor Trusts, \$1,513,858 86

The current income was..... \$51,575 62

There has been received from the State of Pennsylvania on account of appropriations for the Wills Hospital

Maintenance \$9,669 55

Improvements 7,281 45

\$16,951 00

The receipts from legacies, donations, &c., were \$102,013 07

The donations were from

Midvale Steel Works..... \$100 00

Sundry Donors..... 616 31

Cash receipts on Donation Day, April 2d,
1904, the 72d Anniversary of the found-
ing of Wills Hospital..... 691 50

and the legacies from the

Estate of Bushrod W. James (*cash only*).... \$83,924 06

“ Simon Muhr..... 10,000 00

“ Louisa I. Cromwell..... 2,375 00

“ Lewis Elkin..... 4,306 20

The last two were bequests to the funds of the Wills Hospital.

The legacies were added to the permanent funds and the other amounts are included in the current income.

The receipts from the estate of Simon Muhr ... \$10,000

were in addition to sums received in previous years.

The bequests of

Lewis Elkin.....	\$4,306 20
Louisa I. Cromwell	2,375 00 and
Bushrod Washington James, M. D.....	83,924 06

are new.

The capital account of the Bushrod W. James Funds now stands as follows:

	Cash.	Bonds. (Par value.)	Real Estate. (Tax Valuation.)	Total Endowment.
Institute..	\$48,120 54	\$12,000 00	\$7,800 00	\$67,920 54
Library...	34,303 52	23,900 00	21,900 00	80,103 52
Cemetery..	1,500 00	50	1,550 00
	<u>\$83,924 06</u>	<u>\$35,900 00</u>	<u>\$29,750 00</u>	<u>\$149,574 06</u>

The appropriation from the Commonwealth of Pennsylvania is being expended for maintenance and for permanent improvement of Wills Hospital, as directed in the Act of Assembly.

A further sum of \$11,578.69 will be received under this Act and it is hoped that additional appropriations for maintenance and for the completion and equipment of the Contagious Ward will be made by the Legislature now in session at Harrisburg.

The principal expenditures were:

Wills Hospital Maintenance.....	\$25,103 94
“ “ Improvements	7,281 45
Mary Shields Almshouse Fund.....	3,854 66
Fuel Funds.....	9,354 85
Food—Bread and Soup.....	843 00
Books, medals, school purposes, &c., including annual payment to the Southwark Library from the Grover Estate ...	1,811 90
Simon Muhr Scholarships.....	2,978 24

The total cost of the administration of all the Minor Trusts was \$2979.91.

The MARY SHIELDS ALMSHOUSE FUND continues its work of "making more comfortable the sick and insane poor," the expenditures in the Philadelphia Hospital having been:

Coach rides and trolley excursions.....	}	\$812 00
Concerts, entertainments, &c.....		
Salary of Visiting Physician.....		700 00
Books, games, musical instruments, &c.....		479 54
Provisions and delicacies.....		1,414 29
Material for employment (mattress making).....		360 83
		<u>\$3,766 66</u>

The income from the ANN ARMITT FUND, \$88, has been expended for the same purpose.

From the STEPHEN GIRARD SCHOOL FUND \$299.78 was expended for 279 new books and the rebinding of 95 books already in the libraries of the six grammar schools in the (old) city of Philadelphia.

None of the income of the JULIANA H. GOOD FUND were expended, but \$300 were paid from the GROVER FUND to the Southwark Library Company.

The increase in the income of the SIMON MUHR FUND was sufficient to establish an additional scholarship.

The seven scholarships are creditably filled by
 3 young men in the University of Pennsylvania,
 3 young women in Wellesley College, and
 1 young woman in the University of Pennsylvania.

The customary awards of one gold and one silver medal were made to the ranking scholars in the Commercial Course and in the General Course of the Girls High School, under the provision of the HANNAH M. DODD MEDAL FUND.

The report of the condition of the JOHN SCOTT and the DR. BENJAMIN FRANKLIN FUNDS for "loans to young married artificers," &c., is as last year. No loans have been applied for and no demand has been made for the amount to the credit of the suggested art gallery in Fairmount Park.

The latter fund now amounts to \$154,273.05, of which sum \$117,765.65 is ready to be expended upon this building.

Upon the recommendation of the Franklin Institute, thirteen medals and premiums were awarded from the income of the JOHN SCOTT MEDAL FUND to "ingenious men" for "useful inventions."

In addition to the medals, certificates setting forth the facts of the award are issued to the successful inventors. These have been of great service in the introduction of the appliances found of sufficient importance to be rewarded with a medal.

From the income of eleven FUEL FUNDS, 1585 tons of coal were distributed under the personal direction of the members of the Board.

Of the coal, 1030 tons were paid for from the income of the Thomas D. Grover Fund. The conditions of this Trust limit the distribution "among white widows of respectable character, who are housekeepers or roomkeepers, born within the limits of the United States of America, whose husbands shall have died within the present defined boundaries of the district of Southwark."

The other coal purchased was distributed as follows:

1	trust in the former district of Spring Garden..	16½ tons.
1	" " " " " " " the Northern Liberties.....	35 "
4	" " " old city of Philadelphia.....	236½ "
4	" " " present city of Philadelphia.....	267 "
Total!.....		<u>555</u> "

The total distribution during the current winter was 1585 tons at a cost of \$9,354.85, as against 1311 tons, costing \$9,392.48, during the previous winter.

From the BOUDINOT LANDS, in Centre County, the receipts from timber cut were \$2545.76. There were no forest fires of moment during the year and the second growth of timber is doing well.

The incomes of the PAUL BECK SOUP FUND, the ANDREW R. CHAMBERS FUND, and the SAMUEL SCOTTEN FUND, and the specific bequest provided in the will of THOMAS D. GROVER, were distributed to the eight soup societies of the city.

The affairs of WILLS HOSPITAL and its buildings are in a more satisfactory condition. The summary of the receipts and expenditures, printed on pages 28 and 29, shows a better financial state than for the previous year.

The receipts from donations were slightly less, but those from legacies were much greater in amount.

The balance of the appropriation from the State will be paid during the first three months of 1905 and will be expended in work on the Contagious Ward. Other sums are needed for the completion of this ward and still others for the maintenance of patients who cannot now be treated.

The following changes in the SURGICAL STAFF occurred during the year:

Resigned: Dr. William J. Hain, Assistant Surgeon.

Retired on expiration of term: Dr. John R. Taylor, Resident Surgeon; Dr. Robert I. Bullard, Resident Surgeon.

Appointments: Dr. J. Norman Risley, Assistant Surgeon; Dr. James A. Kearney, Resident Surgeon; Dr. Owen M. Deems, Resident Surgeon.

The report of the MEDICAL STAFF OF THE WILLS HOSPITAL (*Appendix G*) gives detailed and interesting statistics of the work of the year, as will be seen from the following abstracts:

Number of patients treated:

	1903.	1904.	Increase.	Decrease.
House patients.....	619	764	145	...
Clinic patients.....	<u>14,249</u>	<u>13,508</u>	<u>...</u>	<u>741</u>

Number of new patients:

House patients.....	717
Clinic patients.....	<u>13,508</u>
Total.....	<u><u>14,225</u></u>

Number of visits of patients to clinics..... 54,750

SUMMARY OF OPERATIONS.

Cataract (primary and secondary).....	299
Operations on the Iris.....	92
" " " Cornea.....	3,014
" " " Conjunctiva and Sclera.....	230
Enucleation of Eye-ball.....	112
Operation on the Lachrymal Apparatus.....	520
" " " Lids and Eye-brows.....	334
" " " Muscles.....	74
" " " Orbit and Sinuses.....	12
Foreign Body Vitreous.....	<u>0</u>
Total number of operations.....	<u><u>4,687</u></u>

The suggestions of desirable and needed enlargements and improvements in the buildings of the Hospital, named in the report, have the cordial approval of the Board, but want of funds makes them impossible.

The current receipts are barely sufficient for current needs, and for permanent additions we must look to the Legislature for additional appropriations.

There has been a material increase in the number of house patients and some decrease in the number of clinic patients, but our clinic rooms are still overcrowded.

Number of patients treated:

Admitted as House patients, resident in Philadelphia.....	312
Resident elsewhere.....	405
Total.....	<u>717</u>

The House patients are classified as follows:

	Males.	Females.	Total.
Number on January 1st, 1904.....	37	10	47
Admitted 1904.....	<u>495</u>	<u>222</u>	<u>717</u>
	532	232	764
Discharged 1904.....	<u>507</u>	<u>219</u>	<u>726</u>
Remaining December 31st, 1904.....	<u>25</u>	<u>13</u>	<u>38</u>

The discharges were as follows:

Cured.....	457
Improved.....	235
Unimproved.....	24
Died.....	1
Left without discharge.....	9
	<u>726</u>

The total number of patients treated at Clinics is classified as follows:

From 50 of the 67 counties of the State.....	12,608
From 15 other States.....	900
Total.....	<u>13,508</u>

Of those admitted as House patients, there came from

42 counties of the State.....	631
From 8 other States.....	86
Total.....	<u>717</u>

Total number of patients treated since the opening of the Hospital in 1834:

House patients.....	25,163
Clinic patients.....	318,647
	<u>343,810</u>

The residences of patients are as follows:

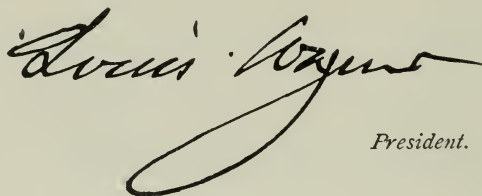

Pennsylvania.	House Patients.	Clinic Patients.	Total.	Pennsylvania.	House Patients.	Clinic Patients.	Total.

The thanks of the Board are again tendered to the friends who have come so liberally to the help of the Wills Hospital, and especially to the Governor and to the late General Assembly of the Commonwealth of Pennsylvania, for the appropriation of State funds.

As stated so frequently in previous reports, the work of the Hospital is limited only by the amount of its current income, and it is not confined to the city of Philadelphia and its immediate vicinity, but it extends to all parts of the State.

We submit to the Board of Appointment, to the Councils of the city, and to the Legislature of the Commonwealth, the Thirty-fifth Annual Report of the many trusts under our care, varying in amount of invested capital from \$100 to \$21,495,072, and in income, from \$7.46 to \$1,533,677.33, and we ask a careful examination and consideration of the reports of the several executive officers in actual charge of these trusts, in the belief that the results of their work and of our supervision will have your approval.

On behalf of the Board of Directors of City Trusts.

A large, elegant handwritten signature in cursive script, reading "Louis Rogers". The signature is written in dark ink and features a long, sweeping underline that extends to the right.

President.

APPENDIX D.

OFFICERS OF GIRARD COLLEGE.

JANUARY 1, 1905.

PRESIDENT.

ADAM H. FETTEROLF, Ph. D., LL. D.

VICE-PRESIDENT.

WINTHROP D. SHELDON, A. M., LL. D.

FACULTY AND TEACHERS.

GIRARD COLLEGE.

PRESIDENT'S REPORT FOR 1904.

To the Board of Directors of City Trusts:

GENTLEMEN:—During the year 1904 there were admitted to the College 245 boys.

DISCHARGED:—

Indentures canceled—

To enable them to accept positions.....	204	
Given up to mother.....	1	
On mother's plea of ability to support...	4	
For mental incapacity.....	2	
		211
Eighteen years of age.....	13	
Dropped from the rolls.....	1	
Expelled.....	14	
		239
Died.....	3	
Total.....	242	

CHANGES.

Miss Laura Mae Benson, teacher in First Form, resigned August 31st.

Dr. Howard G. Fretz, Resident Physician, resigned August 31st.

Miss C. Jessica J. Donnelly, teacher in Second Form, resigned September 10th.

Miss Mary McBride, governess, resigned September 30th.

Lieut.-Col. H. G. Cavanaugh, Professor of Military Science and Tactics, was relieved at his own request December 5th.

Miss Mary D. Ware, teacher in Third Form, resigned December 31st.

The vacancies were filled as follows:—

In the Department of Instruction, Miss M. Jennie Dome, Miss Sophie R. Worthington, and Miss Alice B. Ragotzky were appointed to fill the places made vacant by Miss Benson, Miss Donnelly, and Miss Ware. In the Household Department, Miss Helena Lau succeeds Miss McBride.

Dr. Sidney J. Repplier served temporarily as Resident Physician until January 1st, 1905, when Dr. M. F. Sewall was regularly appointed.

The Professorship of Military Science and Tactics has not yet been filled.

We lost also during the year Mr. George Huster, the College Head Gardener, whose death took place April 13th. Mr. Huster had been in the employ of the College since October, 1872. He is succeeded by Mr. Edwin V. Lonsdale.

Mr. Frank Sauer, Superintendent of the Shoe Department since January, 1896, died March 9th. Mr. George Kramer was appointed to the vacancy.

THE NEW COURSE OF STUDY.

The principal event of educational importance for the year 1904 was the adoption of the revised course of study, which went into operation at the beginning of the Fall term. While the revision in its general outlines does not differ essentially from the pervious course, there are many changes in detail. The work in the different departments is more fully described and certain new features are added.

It requires considerable time for each grade to become fully adjusted to these rearrangements and additions, and to bring each class into line with its own proper work as assigned in the course. This process of adjustment has been going on since the beginning of the term, and will require still further time before it is completed. To aid in effecting this the Vice-President of the College has had frequent conferences with the teachers of the separate grades. These conferences

will be continued as may be found needful. Their purpose has been to go over the details of the work subject by subject as outlined in the course, to make such explanations as may be necessary, to call attention to any features or topics that are liable to be neglected or require special emphasis, to offer suggestions as to ways and means by which the requirements of the curriculum may best be carried into execution, and to answer any questions that may be proposed.

The new text-books introduced with the revised curriculum have met with general approval. While the text-book, however excellent it may be, should never become the teacher's master, or be slavishly followed to the exclusion of the teacher's own discretion or initiative, it is useful and necessary both for instructor and pupil as an outline of the work required and as a means of giving steadiness, uniformity, and orderly progression to the teaching of each subject. Much must be done by the teacher outside of the modicum of the requirements contained in the text-book to supplement it and impart interest and variety to every lesson. The aim has been to provide the very best books available for class use, not only as text-books, but also as aids to the proper use of the text-book. In order to awaken the pupil's interest and give him a wider view of any subject than that offered by the class-book alone, the curriculum calls for many books beside the text-book, to be employed as auxiliary to it—books that furnish the view-point of different writers upon the topics of the lesson, and other books that give a more popular treatment and cast an interesting side-light upon the subjects treated in the more formal text-book.

MANUAL TRAINING.

The Mechanical Department has been able to carry out with gratifying efficiency substantially all the requirements of the laboratory courses in manual training, as laid down in the new curriculum. An important and interesting event of the year was the visit and reception of the members of the Eastern Manual Training Association, which had its annual

meeting in Philadelphia in the Summer of 1904. Its membership is composed of the instructors in the leading manual training schools of the country. They greatly enjoyed their visit and expressed much interest in, and appreciation of, the methods and work of our schools. From time to time during the year there have been many other visitors professionally engaged in different forms of education. Among them were some foreign delegates on their return from the St. Louis Exposition. It is gratifying and encouraging to our workers to note the intelligent, discriminating interest they manifested and the favorable judgments that these visitors freely expressed upon the curriculum and work of the institution.

SLOYD.

The interest and zeal with which the boys have worked in sloyd has never been greater than during the past twelve months. During the year the boys have made thirty different models which may be said to be characteristic sloyd work, and the construction of which has involved the use of twenty-five different hand tools. In addition to this, ten different projects of considerable size have been constructed by the boys, including, among other things, a chair, tabourette, book rack, boxes, bookcase, and mahogany seat. One project designed and constructed by a boy thirteen years old is worthy of special mention. This was a model for a machine to separate garlic seeds from wheat. The whole problem, involving several rather complex principles, was worked out in detail entirely by himself, and gave every promise of working successfully if made full size. A knowledge of the difference in the specific gravity between wheat and garlic seed was very ingeniously applied, and provision made for drying the wheat immediately upon its removal from a tank of water. If one great value of manual training lies in the fact that it furnishes a means of self-expression for the pupil, surely this boy obtained a valuable training from the construction of this project. As the boys pass through the sloyd work they are taught the names,

care, and typical use of all tools employed. They are also taught how to sharpen the knife, as well as the name and principle of the different kinds of lumber used in the sloyd room. In addition to this, the aim has been to teach the boys carefulness, neatness, and accuracy in their work, and especially, as far as practicable, independence of thought and action throughout their work.

BASKETRY.

A new feature in manual work of the year 1904 was the basket work of the Summer vacation. During a part of May and June about twenty-five of the teachers of the First, Second, and Third Forms came to the sloyd room three times a week and spent the noon hour in taking lessons in simple basket making. The plan was that they should acquire enough knowledge of basketry to be able to teach simple basket work to the boys who remained in the College during the Summer vacation. All the teachers who took the work entered into it enthusiastically and worked with zeal and earnestness. When it came to the vacation time practically all the teachers who had learned basketry had their boys do more or less of this work. The boys were so much interested that they wished to make baskets during the entire time that they were in the school rooms, but in order that they might not lose their interest it was thought advisable by the teachers to restrict the work largely to the morning hours. Baskets of various shapes and of sizes varying from a small bird's nest up to a good sized work-basket were successfully constructed by the pupils. The work done by the small boys in Building No. 7 is especially worth noting. A large number of these lads succeeded in making mats and small baskets, and thoroughly demonstrated that manual training in a suitable form is practicable even for the smallest of our boys. Too much praise can hardly be given to the teachers who voluntarily took upon themselves this extra work and made it the success it has proved. If results as successful as those obtained last Summer by our

regular grade teachers with the very limited training which they received are possible, what might we not expect if we had teachers especially trained to this line of work? This suggests the advisability of introducing some form of manual training for all boys of the two lower forms. It is believed that during these early years manual instruction has its greatest value and significance as an educational factor.

TRADE TEACHING.

As mentioned in my last annual report, at the opening of the year 1902 a special course in trade instruction covering a period of two years was introduced. By dropping a few studies of the regular course and by devoting two hours per day of their play time, boys are able to spend twenty-four hours of each week in the Mechanical School. During the three years that this course has been in operation sixty-five boys have been under instruction in the different departments, as follows:—

Metal working.....	20
Electrical mechanics.....	18
Pattern making.....	14
Foundry.....	10
Plumbing.....	3
<hr/>	
Total.....	65

Thirty-one have gone out to employment, all but five of whom had taken the full course. Twenty-two of these are engaged in mechanical pursuits, three are clerks, one a stenographer, one a trolley car conductor, one a newspaper artist, and of the remaining three we do not at present know the occupation.

PHYSICAL TRAINING.

The year 1904 has been marked by an important advance in the Department of Physical Instruction, which has been

rearranged upon broader and more modern lines, as described in the curriculum. When the ideas and plans contemplated are fully realized, we may expect a decided improvement in the physical condition and growth of the pupils. The exercises are of great variety and are skillfully adapted to call into action all the bodily powers and to produce an all-around harmonious development. They have been entered into with general heartiness and are enjoyed by all. The adaptation of the exercises to individual needs and to special cases as they may be discovered is a valuable and essential part of the work that falls within the province of this department.

In arranging school work in physical training we must consider the conditions of modern school life, which require the boy to remain measurably still for five or six hours each day, seated at a desk that does not always "fit" him, and of being deprived of that muscular activity which Nature intends every growing child should have, and as a result of which we often find an unsymmetrical, poorly developed condition—the chest contracted and flattened, the shoulders rounded, and the head and abdomen protruding. The object of physical exercises in the school is to counteract the effect of the school desk and school life upon the growing body of the boy. The results aimed at in our work are mainly as follows:—

To secure a correct carriage of the head, shoulders, and spine;

To secure greater expansion of the chest and greater heart and lung capacity; *

To stimulate the circulation and increase the perspiratory activity;

To strengthen and quicken all the bodily functions, thus securing general vigor and increasing the power of resistance to disease;

To aid in acquiring the capacity for co-ordination, so as to bring the body under perfect control of the mind.

In the lower grades the question of correct posture is of supreme importance, because as a result of unsymmetrical development, the boy has acquired a distorted muscular

sense; and a new adjustment of the muscles and its maintenance is necessary until correct posture has become a fixed habit. This is best secured by free movements, because of the concentration of the attention upon the muscular sense. Free movements are therefore used in the lower grades, but as the motor sense of the boys in these grades is but poorly developed, the exercises at first must be simple, such as can be done without too great a mental effort on the part of the boy.

For the First School, simple movements of one part of the body are used, with the object of developing the muscular sense, so that the boy gradually assumes a correct carriage.

For the lower grades of the Second School, movements of two parts of the body in the same direction are used, which have for their object the correct carriage of the head, shoulders, and spine, and to increase the circulation and respiration.

For the upper grades of the Second School, movements of two parts of the body in the same and dissimilar directions are used, thus making greater demand upon the powers of co-ordination, as well as upon the circulatory and respiratory systems.

For the lower grades of the Third School, movements of two or more parts of the body in the same and in opposite directions are used, calling into vigorous action the larger muscular groups of the body, thus making a greater demand upon the muscular powers.

The limitations of free movements are reached about the time when the pupil's interest flags and the work seems too easy, which is due to the development of the motor sense. His powers of co-ordination, his physical powers, now instinctively demand something to do which will require greater skill, more expenditure of muscular strength, and a greater range of movement than is possible with the free movements alone. Hence it is advisable at this stage of the work to use hand apparatus because of the more stimulating effect of the exercises upon the circulation, respiration, and other physiological processes. These effects are produced partly by means of the resistance of the weight of the

apparatus to muscular action and partly by the greater control of the physical powers which comes from the handling of the apparatus itself.

For the upper grades of the Third School, wooden wands, rings, and dumb-bells are used, and vigorous exercises calling into play the large groups of muscles of the shoulders; back, abdomen, and spine are given, calling for greater muscular effort than heretofore and increasing the powers of endurance.

For the Fourth School, large wooden dumb-bells and iron wands are employed, the use of which makes an ever increasing demand upon the whole muscular system. Exercises of a more complicated nature are also given, which require mental alertness as well as a certain degree of muscular skill and quickness for their graceful and successful execution, thus bringing about a quickness and grace in movement and carriage of body so desirable in both boy and man.

In addition to the above, in the upper grades of the Third School and in the Fourth School, exercises on the floor and on the desks are occasionally given, which require the holding, lifting, or moving of the body.

As physical training work should be recreative as well as developing and corrective in its effects, the element of play should enter largely into any scheme of physical education. Games, both indoor and outdoor, are taught to the boys in all the grades, particular stress being laid upon such games as require alertness, courage, and self-reliance, as well as loyalty to class or team.

In addition to the regular work, special exercises are prescribed for boys needing them, as far as they have come under the instructor's notice.

COMMENCEMENT EXERCISES.

As we make our school promotions twice a year, it follows that we graduate two classes annually. The class graduated at the end of the Fall term of 1903 held their commencement exercises January 22d, and those graduated at the

close of the Spring term of 1904 held their exercises June 24th. On the former occasion the address to the class was delivered by Judge G. Harry Davis, and on the latter by William H. Staake, Esq., of the Philadelphia Bar. These exercises, which are held in the College Chapel in the presence of the whole school, are among the most interesting events of the year, and have an elevating and stimulating influence upon the youthful audience. The attendance of friends of the graduates and others from the outside is large.

THE SUMMER ENCAMPMENT.

The cadets had their usual encampment at Island Heights, N. J., beginning with the 6th and ending with the 15th of July. It was one of the most successful seasons in camp that we have had. The weather was favorable, and the mosquitoes which have so disturbed the boys in other years, were not seriously in evidence. On July 13th, Lieut.-Col. Charles Humphreys, Artillery Corps, U. S. Army, visited the camp and made the annual inspection. His report, which is too long to be printed here, is highly complimentary to Commandant, line officers, and privates. The report of the Commandant, Lieutenant-Colonel Cavenaugh, is appended herewith.

THE SUMMER VACATION.

During the Summer vacation, beginning with July 4th and ending with September 4th, boys were granted leave of absence as follows:—

8 weeks.....	417
7 weeks.....	189
6 weeks.....	91
5 weeks.....	18
4 weeks.....	115
3 weeks.....	43
2 weeks.....	93
1 week.....	31
Less than one week.....	37
No vacation.....	431

Of those who had no vacation, 94 were in camp with the cadets at Island Heights from July 6th to 15th.

THE ANNIVERSARIES.

The following anniversaries are observed during the year:—

1. New Year's Day. On the morning of this day exercises are held in the College Chapel, consisting of a short religious service, singing by all the boys, and the rendering of a few special choruses. This is followed by an address by some member of the Board or some one selected by them.

2. Lincoln's Birthday. This is known as Premium Day, when the awards and prizes for the preceding year are announced and distributed. There is also music and an address, the same as on New Year's Day.

3. Washington's Birthday, on which there is music by the College band, the reading of Washington's Farewell Address, and two suitable patriotic declamations, all by the boys.

4. Founder's Day—May 20th. This is *the* day of the year, and seems to be growing in interest and importance as the years pass. A banquet is given to all former pupils of the College who revisit the institution. There are exercises in the Chapel in the afternoon, when there is an address by some distinguished citizen, and later in the day there is dress parade and review by some military officer of high rank. In the year 1904 the address in Chapel was given by Hon. Stewart L. Woodford, and Lieutenant-General Chaffee reviewed the cadets.

5. Memorial Day—May 30th. On this day there is a brief but impressive ceremony at the monument erected in the grounds to the memory of Girard College graduates who died in their country's service.

6. Independence Day—July 4th—is observed by appropriate exercises in the Chapel, consisting of music, the reading of the Declaration of Independence, and two declamations suitable to the day and the occasion.

7. Arbor Day. During the last three years we have also observed Autumn Arbor Day by appropriate exercises. These

consist of reading the Proclamation of the State Superintendent of Public Instruction, declamation, and singing in the Chapel, after which a tree is planted by the members of the highest two classes.

8. Thanksgiving Day. On this national holiday we have special services in the Chapel, the reading of the Thanksgiving Proclamations, followed by an address. Last year the boys had the pleasure of listening to an admirable address by the Mayor of the City, Hon. John Weaver.

We aim to have each anniversary day teach its appropriate lesson. Those which commemorate great national events should inculcate the lesson of patriotism, love of country, civic pride, and good citizenship. The birthdays of great men should call to mind the noble qualities of mind and character which distinguished them, while the study and contemplation of them should inspire the young to imitate their example and emulate their virtues.

HEALTH OF THE COLLEGE.

The report of the College physicians, which is herewith submitted, shows that 2356 cases were treated in the year 1904. It will be noticed that there were during the year eight cases of typhoid fever, five of diphtheria, seventy-six of scarlet fever, forty-four of measles, and fifteen fractures, as compared with 1903, when there was no scarlet fever, no measles, three cases of diphtheria, seventeen of typhoid, and twenty-one fractures. There were three deaths in 1904, as compared with six in 1903. Total number of cases treated in 1903, 2568. The general health of the boys has been excellent. The death rate of the institution, taken by decades, shows a gradual decrease.

SAVINGS FUND ACCOUNT.

The savings bank scheme, begun in 1892, continues to meet with favor. The boys are pleased with the idea of

having a bank account of their own, and take pride in putting by their little savings in this way. We receive deposits about ten times a year. We have just taken the offerings that came in after the Christmas holidays, amounting to \$333.30. We have now in the Philadelphia Saving Fund about \$2400, the property of 375 depositors.

GROUNDS AND BUILDINGS.

The condition of the grounds and buildings is in general satisfactory. On some of the playgrounds the asphalt needs repairing, and on others the surface dressing should be renewed. Several of the school buildings would be improved by a coat of paint, which they will no doubt receive during the vacation of the coming Summer. More room is needed in the building assigned to the blacksmithing and foundry department of the Mechanical School. This improvement has been asked for and is now being considered by the proper Committee. The laboratory of Chemistry and Physics in the Main Building should have better ventilation and an equipment more in keeping with modern methods. The greenhouse and propagating houses will also soon have to be thoroughly overhauled.

A colony of gray squirrels, introduced last Spring, have become a pleasant feature of the College grounds. They were purchased in two installments, the first of which was paid for by the boys and the second by the teachers and officers. The little quadrupeds seem to have won all hearts. They have received nothing but kindness from the boys, and have at the same time become a source of entertainment and an interesting study of animal life on the part of our adult population. No one thinks of doing them any harm, and such is the feeling of tenderness for them that should they receive abuse from any source, every boy in the College would rally to their defense. To say nothing of the positive pleasure they have afforded us all, they have taught a most valuable lesson in kindness to dumb animals.

I cannot close this report without again returning thanks to the gentlemen of the Board for their wise counsel and cordial support and commending the teachers and officers for faithfulness to duty.

Respectfully submitted,

ADAM H. FETTEROLF,
President.

GIRARD COLLEGE INFIRMARY,
PHILADELPHIA, January 2d, 1905.

A. H. FETTEROLF, PH. D., LL. D.,
President.

DEAR SIR:—During the year ending December 31st, 1904, the following cases were treated in the wards of the College Infirmary:—

Abscess	34	<i>Brought forward</i>	394
“ mastoid	1	Fever, scarlet	76
“ alveolar	1	“ simple continued,	25
Acne	1	“ typhoid	8
Adenitis	20	Fracture	15

Napkins		111 00
Sal soda	3,000 pounds	20 70
Table cloths		15 46
Toweling		106 32
Sundry subsistence		344 18
Total		<u><u>\$114,295 95</u></u>

The average number of boys maintained during the year was 1516, making the cost of subsistence *per capita* \$75.39. The table expenses of officers and employés and of the Summer encampment of the Battalion of Cadets at Island Heights are, as usual, included in the above figures. Compared with the year 1903 there is an increase of \$941.17; but under our improved methods of accounting inaugurated this year all supplies incidental to storing, preparing, and serving of food, in addition to foodstuffs, are charged to the item of Subsistence.

The buildings and grounds have been kept in their usual good condition during the year. The Chapel has been thoroughly renovated and painted and now presents a very attractive appearance.

The construction of the granolithic walk on the playground used by the pupils of Building No. 7 has been the source of much comfort and pleasure to the boys, giving them a play space which can readily be cleared and used in wet weather or when the ground is covered with snow.

During the year we lost by death two of our most faithful and conscientious employés. On March 9th, 1904, Frank Sauer, Superintendent of the Shoe Shop, died suddenly. He had been in our employ for over eight years, and during that time his work was always well and efficiently done.

George Huster, Head Gardener, died on April 13th, 1904. He was appointed to that position October 1st, 1872. During the thirty-one years of his connection with the College he was always faithful and ever anxious to improve conditions, and to his good ideas and wise judgment much of the present excellent appearance of the grounds is due.

It gives me pleasure once more to testify to the faithful discharge of duty by the foremen and employés in the several departments.

Respectfully submitted.

FRANK O. ZESINGER,

Steward.

HEADQUARTERS CORPS OF CADETS.

GIRARD COLLEGE,
PHILADELPHIA, PA., October 14th, 1904.

*Adam H. Fetterolf, Ph. D., LL. D., President, Girard College,
Philadelphia, Pa. :*

SIR:—I have the honor to submit the following report of the camp of the Girard College Cadets:—

In accordance with Orders No. 330 herewith the Battalion; consisting of six companies, band, field music, and signal detachment, left the College at 6.30 A. M., July 6th, and marched to the Pennsylvania Railroad, Broad Street Station, halting and saluting at the statue of Stephen Girard on the west side of the City Hall, leaving on a special train at 8.10 and arriving at Island Heights at 10.30 A. M., and marching to the site where the former camps had been established. After the ceremony of raising the flag, the Battalion was dismissed and the necessary camp and tent equipment was issued and the camp put in order.

The Camp Guard formed and sentinels were posted in a very satisfactory manner.

Drills in the morning were succeeded by the ceremony of guard mounting. The afternoon drills and parade attracted many persons from the neighboring towns. The improvement in drill was quite noticeable. Credit should be given to the cadet officers and to all the members of the Battalion for their desire to improve by study and practice. The presentation of a sword to the captain commanding the best company was a great incentive to officers and companies.

The weather throughout the encampment was all that could be desired, and there was a noticeable absence of mosquitoes.

A sail boat, of the capacity of about one-half company, was in use twice daily, enabling us to send at least one company on a pleasure trip down the bay each day, which was thoroughly enjoyed by the cadets.

The report of Surgeon H. G. Fretz, Resident Physician of the College, who acted as Camp Surgeon, is herewith submitted.

The hospital was in the same building used for the last five years; its use as a hospital was very satisfactory owing to the care and attention of our officers and employés.

Mr. Frank O. Zesinger, Steward of the College, had charge of establishing the camp and of the supply department.

The following is the daily routine of the camp:—

July 6th.—Arrived in camp at about 11 A. M. Camp established and cadets taken to swim.

Hon. Edwin S. Stuart, Hon. William Potter, and Mr. Alfred Moore, members of the Board of Directors of City Trusts, also Mr. Frank M. Highley, Secretary of the Board, accompanied the Battalion from Philadelphia to the camp and spent the day there.

July 7th.—Usual camp duties performed until noon, when a heavy thunder storm accompanied with lightning became so severe that the sentinels were taken off post.

July 8th.—Rained during the whole morning. Drill and parade in the afternoon.

July 9th.—Battalion inspection in the morning with the usual camp duties.

Mayor Weaver, of Philadelphia, and a member of the Board of Directors of City Trusts, with a party from Seaside Park, visited and inspected the camp. Dr. John S. Boyd, Mr. John M. Campbell, a member of the Board, and two friends visited camp and remained until Monday morning, July 11th.

July 10th.—Sunday. No military duties other than guard duty were performed by the cadets.

Mr. Cunningham and Mr. Evans, of the College, also Dr. Henry G. Godfrey, former Resident Physician of the College, visited camp during the day.

July 11th.—Major John T. Knight, Quartermaster's Department, and Lieut. Howard C. Price, Fifth Infantry, United States Army, visited camp as judges of competitive drill of the companies for the sword to be given the captain who had the best drilled company.

The usual drills in the morning, the afternoon being taken up with the company drills. Parade in the evening.

Mr. John H. Michener, member of the Board of Directors of City Trusts, visited camp and remained over night.

July 12th.—The usual routine drills and duty performed.

July 13th.—Hon. Edwin S. Stuart, Mr. Joseph L. Caven, Hon. William Potter, Mr. Alfred Moore, Hon. John Weaver, all members of the Board of Directors of City Trusts, Dr. A. H. Fetterolf, President of Girard College, Mr. Frank M. Highley, Secretary of the Board, Mr. James Caven, and Hon. D. Newlin Fell, Justice of the Supreme Court of Pennsylvania, visited the camp and spent the day.

Lieut.-Col. Charles Humphreys, Artillery Corps, United States Army, Special Inspector, visited the camp and inspected the Battalion in review, battalion, and company drills, close and extended order, advance and rear guard, parade, and Butts Manual, tents, kitchen, and hospital.

July 14th.—The usual camp routine. During the afternoon parade the prize sword was presented to Cadet Captain Pierce for having the best drilled company, and the Commandant's prize, a five dollar gold piece, was presented to Captain Stubblebine for being the officer best posted in his duties and in the performance thereof.

July 15th.—Broke camp and returned via the Pennsylvania Railroad to the College, arriving there at about 5.45 P. M.

The report of Lieut.-Col. Charles Humphreys, Artillery Corps, of his inspection of the Battalion and camp, is attached. I am,

Very respectfully,

H. G. CAVENAUGH,

*Lieut.-Colonel, United States Army; Professor
Military Science and Tactics.*

HEADQUARTERS CORPS OF CADETS.

GIRARD COLLEGE,
PHILADELPHIA, PA., July 1st, 1904.

Orders No. 330.

I. By direction of the Board of Directors of City Trusts, the Girard College Cadets will, on July 6th, 1904, proceed by rail from Philadelphia, Pa., to Island Heights, New Jersey, and there go into camp.

II. The camp thus established will be named "Camp Stephen Girard."

III. At 6.30 A. M., July 6th, the battalion will be formed in line in front of building No. 5 (President's office). The route of march will be south on Corinthian Avenue to Fairmount Avenue, to Twenty-first Street, to Mt. Vernon, to Broad Street; Broad Street to the Pennsylvania Railroad Station, Broad and Market Streets. The Corps of Cadets of Girard College will upon arrival at the statue of the founder of the College, on west side of City Hall, render such appropriate ceremony as may be fitting they should in appreciation of all the benefits derived by them from his forethought and generosity.

Upon arrival at Island Heights the battalion will disembark, and form in line east of depot facing west.

Immediately upon arrival in camp the flag will be hoisted, the first relief of the guard posted, and the companies then stack arms in their company streets. The companies will march to dinner; after dinner the clothing and camp equipage will be distributed, and the tents put in order.

IV. The following regulations will be strictly observed during the encampment:—

All entrance to and exit from the camp, for cadets, will be by the tent of the officer of the guard.

No cadet will leave camp without special permission.

No cadet will go in bathing out of the regular hours.

No cadet will be allowed in rear of the line of cadet officers' tents except to march to meals, visit the sinks, or to see the commanding officer.

Cadets desiring permission to leave camp will send their applications on the prescribed form, through their Captains, before 7.45 A. M.

Cadets on leaving camp will present their permits to the officer of the guard for examination. Upon returning to camp cadets will turn over to the officer of the guard their permits, who will indorse on the back thereof the time of return. These permits will be returned daily to the commanding officer by the old officer of the day, immediately after guard mounting, with the guard report-book.

The band will practice during the prescribed drill hours.

For minor offenses cadets will be deprived of their privileges.

For serious breaches of discipline cadet officers will be placed in "officers' arrest" and confined to their tents; other cadets will be confined in the guard tent and have their meals sent to them.

Company morning reports must be at the Adjutant's tent before 7.45 A. M.

A guard consisting of a Captain as officer of the day, a Lieutenant as officer of the guard, one Sergeant, four Corporals, and forty-one privates will be mounted daily. At guard mounting the Adjutant will select the cleanest, neatest, and most soldierly private as Orderly for the Commanding Officer. (See pars. 182 to 191, "Manual of Guard Duty.") The guard will be divided into four reliefs, and the time divided equally among them, so that each relief shall walk post one hour at a time.

Cadets on guard will, when not on post, remain at the guard tents, except during the necessary time at meals, unless given permission to be absent for a necessary purpose by the officer of the guard.

During meal times one non-commissioned officer of the guard and two privates will remain at the guard tents. The other members of the guard, except the relief on post, will be marched in details by the senior members to their company mess tents at the proper time for meals. After the regular meal is over, the relief on post and the other members of the guard will march to (band) mess tent for their meal.

The officer of the day and the officer and members of the guard will not leave the limits of the camp during their tour without special orders of the Commanding Officer.

Challenging will commence immediately after taps.

Between tattoo and broad daylight a countersign will be used to pass all persons except camp employees. These latter will be passed upon recognition.

A trumpeter will be detailed daily to sound the prescribed calls, and a drummer will be detailed daily to act as Orderly for Adjutant's office. They will be carried on the guard report as musicians of the guard.

The following calls will be sounded by the trumpeter, under the supervision of the officer of the guard, who is held responsible that they are sounded at the right time :—

	A. M.		P. M.
First call for reveille	5.45	First call for drill	4.20
Reveille	5.55	Assembly (Battalion drill) . . .	4.30
Assembly	6.00	Recall	5.15
Mess call	6.25	First call for parade	5.30
Assembly for breakfast . . .	6.30	Assembly	5.35
Fatigue call	7.00	Adjutant's call	5.40
Sick call	7.00	Mess call	6.25
First call for drill	7.10	Assembly (for supper)	6.30
Assembly (Company drill) . .	7.15	First call (for Tattoo)	8.30
Recall from drill	8.00	Tattoo	8.40
Guard mounting	8.20	Assembly for roll call	8.45
Assembly	8.25	Taps	9.15
Adjutant's call	8.30		
Water call (for swimming) . .	10.25	BAND CONCERT DAILY, 7.30 P. M.	
Assembly	10.30	BATTALION INSPECTION	
Recall	11.30	SATURDAYS.	
First Sergeant's call	11.45		A. M.
Mess call	11.55	First call	7.45
Assembly (for dinner)	12.00	Assembly	8.00
		Drill calls will not be sounded on	
		Saturdays or Sundays.	

First Sergeants will march their companies to and from meals.

At sick call, cadets desiring medical attendance will report to their First Sergeants, who will send them to the hospital in charge of a non-commissioned officer. (This does not apply to cadet commissioned officers.)

After guard mounting the officer of the day will instruct the members of the guard in their duties as guards and sentinels, and will see that they thoroughly understand said duties.

A report of all delinquencies will be sent to the Commanding Officer with the morning reports.

No punishments will be given unless first approved by the Commanding Officer.

First Sergeants will march their companies to and from swimming. The officer of the day will be present during the bathing hour. He will be held responsible for proper conduct during that time, and will see that all orders on the subject are strictly complied with by the cadets.

A double line of buoys will be anchored. Small cadets will not go beyond the inner line of buoys, and no cadet will be allowed to go beyond the outer line of buoys.

Mr. Jacob Smith is announced as swimming master ; all orders given by him during the swimming hours will be obeyed promptly by any and all cadets.

By order of

LIEUT. COLONEL CAVENAUGH.

(Signed) W. J. DEVINE,
First Lieutenant and Adjutant.

Official :

W. J. DEVINE,
First Lieutenant and Adjutant.

CAMP STEPHEN GIRARD,
ISLAND HEIGHTS, N. J., July 17th, 1904.

Col. H. G. Cavanaugh, U. S. A., Commanding Officer:

SIR:—I have the honor to submit the following report of the medical and surgical cases treated in the field hospital at Camp Stephen Girard, July 6th to July 16th, inclusive:—

I. HOSPITAL WARD CASES:—

1. Headache.....	3 cases.
2. Indigestion.....	5 “
3. Insect bite.....	1 case.
4. Physical exhaustion.....	2 cases.
5. Rheumatism.....	1 case.
6. Vertigo.....	1 “

—

Total number of ward cases..... 13

II. HOSPITAL DISPENSARY CASES:—

1. Abrasion.....	10 cases.
2. Conjunctivitis.....	3 “
3. Contusion.....	5 “
4. Fracture of forearm.....	1 case.
5. Furuncle.....	3 cases.
6. Ivy poisoning.....	2 “
7. Sunburnt.....	2 “
8. Sprain.....	2 “
9. Toothache.....	1 case.
10. Wounds, lacerated.....	6 cases.

—

Total number of Dispensary cases.. 35

Total number of Ward cases..... 13

—

Total number of cases treated.... 48

==

All of the cases treated were of a minor degree and were rapidly convalescent. The average length of treatment for

the ward cases was $1\frac{1}{4}$ days, and for the dispensary cases was 3 days.

The excellent sanitary condition of the camp was due to the efficient policing maintained.

The quality and the quantity of the food and the water were in every way satisfactory.

Respectfully submitted,

H. G. FRETZ, M. D.,
Camp Surgeon.

FORT DUPONT, DEL., July 14th, 1904.

The Inspector-General, Atlantic Division, Governor's Island, N. Y.:

SIR:—I have the honor to make the following report of the inspection of Girard College, Philadelphia, Pa., in compliance with paragraph 1, Special Orders No. 23, Headquarters Atlantic Division, Governor's Island, N. Y., April 23d, 1904, as amended by paragraph 1, Special Orders No. 32, Headquarters Atlantic Division, Governor's Island, N. Y., June 18th, 1904.

I arrived at the camp of this College at Island Heights, N. J., at 10.30 A. M. on the morning of the 13th instant, reported to the President of the College, A. H. Fetterolf, Ph. D., LL. D., who was present at the camp, accompanied by members of the Board of Directors. Upon questioning the President in reference to the Professor of Military Science and Tactics, Lieut.-Col. H. G. Cavanaugh, U. S. Army, retired, was informed that this officer had been, and was, entirely satisfactory to himself and other members of the faculty.

The camp was located on the banks of Tom's River, New Jersey, distant from Philadelphia fifty miles. The College itself is located in Philadelphia, Pa., and was established on January 1st, 1848. The college is non-sectarian. The Military Department was established in 1870, and is popular with the students and satisfactory to the faculty. The military instructor is charged with the enforcement of discipline, breaches of which are punished by extra drills, reprimands, fatigue, and reduction. All students over eleven years of age are required to take military instruction. They wear the prescribed uniform only during the drill hour and while in camp. The number of recitations since last annual inspection have been thirty-five, and upon the following subjects: Drill Regulations, Advance and Rear Guard Regulations, Articles of War, Guard Duty, Ceremonies, and Butts' Manual.

The National Government supplies arms and equipments, and details an officer.

The uniform consists of dark blue blouse, light blue trousers, blue cap, and leggings.

The College has on hand 499 cadet Springfield rifles. Some parts of these rifles were broken. Their condition was fair. They have been used for a number of years. There were also 500 black leather belts, cartridge boxes, and bayonet scabbards. These were badly worn and the leather rotten. They were clean and the scabbards were also clean.

The above are cleaned occasionally by a suitable person, the cadets taking care of guns, belts, &c., while in camp.

The College has no pieces of field artillery and consequently no drill upon that subject.

The above ordnance and ordnance stores are the property of the United States, and regular property returns are rendered to the Chief of Ordnance by the President of the College. All United States ordnance and ordnance stores are insured for their full invoice value.

Of the United States signal property there are on hand 8 flags and staffs in good condition, and 2 heliographs, parts of both broken. Request has been made for two others to replace these broken ones.

For administrative purposes the corps of cadets is divided into six companies for battalion drills, reviews, inspections, and parades.

There is no select company for special drills. There is a band, drum and bugle corps, who are selected from among the cadets. There is an instructor in music for the above, employed by the College.

The Professor of Military Science and Tactics is Lieut.-Col. H. G. Cavanaugh, U. S. Army, retired, who has been on duty at this College since April 13th, 1900. He resides within thirty minutes' ride of the College.

An inspection of the camp was made upon my arrival, and the camp was found to be in excellent condition as to cleanliness and police. The whole camp was beautifully laid out and pleasantly situated. A tent to tent inspection found each one in perfect order as well as the kitchen (a general mess).

The sinks were next inspected, and they too were found

exceedingly clean. The hospital, which had been established in a frame building inside the grounds, and which was in charge of the physician of the College, was found in excellent condition, including the ward rooms, dispensary, dining rooms, kitchen, and the nurses' sleeping apartments. The hour of noon having sounded, each company of the cadets was at dinner under charge of the First Sergeants. The cadets were exceedingly orderly. Their food was inspected and was all that one could wish for, and ample of it.

At 1 o'clock P. M., the Battalion was formed on the parade ground for review and inspection. The Battalion was promptly and properly formed and presented, the commands given by the captains being clear and snappy. In passing in review the marching and alignments were very good. Step was a little slow, but as many of the cadets in the ranks were but eleven years of age, as well as some members of the band, it could hardly be expected that a quicker time could be taken and maintained. After passing in review the Battalion was formed for inspection. The cadets (large ones) handled their guns fairly well. Nearly all the rifles showed long service. In a number, small parts had been lost, and rust had been allowed to leave its marks in the bore. They were, however, fairly clean and were serviceable. Many of the gun slings were long past worn out, were rotten, and had to be held together by strings. The cadets did not carry bayonets, as one or two accidents from the bayonet had happened through careless handling, and it had been thought best to lay the bayonet aside. After this inspection was completed, battalion drill was conducted under Col. H. G. Cavanaugh. The various movements were well executed, showing that the cadets were familiar with the drill. The captains' commands were promptly given; the intervals and distances between companies were very well kept, and the marching good. On account of the limited grounds at the College in the city, as well as of the camp, no instruction has been given the Battalion in extended order. After Battalion drill each captain of a company was called out and directed to drill his company in company drill, the skirmish drill, and also advance guard of company, the form for

attack, advance, and charge. All the companies executed the movements required promptly, and showed much proficiency in their drills. At 3.15 o'clock P. M., the Battalion was dismissed, the companies marching to their tents; at 4 o'clock P. M., the Battalion was formed, and under the supervision of Colonel Cavanaugh, the military professor, the cadets as a battalion were put through the exercises of Butt's Manual, the military band accompanying the movements. All these movements were beautifully executed. The Battalion was then formed for parade under charge of one of their cadet captains. At this ceremony the Battalion was promptly and correctly formed; the manual of arms was very good; the passing in review was very good; and the alignments and distances excellent.

The guard was inspected and was promptly turned out. The officer of the guard was posted in all his duties, and the sentinels on post were also visited. They walked their posts in a soldierly manner and were fairly well familiar with their duties.

An inspection of all books, papers, returns, &c., was then made, and all were found correctly kept.

I enclose one set of questions for officers detailed at colleges and universities with questions answered, one set of questions answered by the Inspector, Efficiency Report of Lieut.-Col. H. G. Cavanaugh, U. S. Army, retired, Professor of Military Science and Tactics at this College, field return of cadets at time of inspection, catalogue of College, and a copy each of Orders No. 330 and 331, issued from Headquarters Corps of Cadets, Girard College, Philadelphia, Pa., dated July 1st, 1904, pertaining to going to camp at Island Heights, N. J., &c.

Very respectfully,

(Signed) CHAS. HUMPHREYS,
Lieutenant-Colonel Artillery Corps, Inspector.

------------	-----

During the past year there were graduated from the Trades School, after taking the full course of two years, 19 pupils, viz.:—

Electrical mechanics.....	7	
Carpentry and woodwork.....	7	
Metal.....	3	
Foundry.....	2	
		— 19

Their employment, at present, is as follows:—

Brass worker.....	2	
Electrician.....	2	
Knitter.....	1	
Machinist.....	2	
Moulder.....	2	
Patternmaker.....	4	
Woodworker.....	1	
		— 14
Mechanical.....		14
Clerk or bookkeeper.....	4	
Stenographer.....	1	
		— 5
Clerical.....		5
		— 19

The “knitter” above mentioned desires to return to the machinist trade as soon as possible, and one of the “clerks” prefers electrical employment; but, on the other hand, one of the “brass workers” is aiming to become a stenographer.

Since there was a decided lull in mechanical industries during the past season, the test, thus far, can scarcely be considered a fair one for the new course of study recently inaugurated, and it is moreover too soon to express an opinion as to the *permanent* value of said course of instruction, as this cannot be accurately formed for some years to come.

In the year 1885, of those pupils registered for admission to the College, sixty-seven and four-fifths per cent. were born in the city of Philadelphia; whereas, in the year just closed, only fifty-five and four-fifths per cent. of the candidates registered were born therein. This may be accounted for.

doubtless, by the fact that the institution is gradually becoming better known in the villages and towns throughout the State, as the departure of boys from rural communities and their return thereto during vacations, &c., are apt to attract more attention than would similar events in a large city.

A report of all pupils who were honorably discharged from the College during the years—

1899.....	189
1900.....	192
1901.....	175
1902.....	185
1903.....	195
	— 936
	==

in number, is as follows:—

Employed, report favorable.....	801
“ “ fair.....	10
“ “ unfavorable.....	2
	— 813
Unemployed, report favorable.....	59
“ “ fair.....	5
“ “ unfavorable.....	4
	— 68
In other institutions.....	9
Died.....	15
Not heard from by friends.....	13
No report.....	18
	— 936
	==

During the year seven deaths have occurred, viz.: three from consumption of the lungs, two from railroad accidents, one each from typhoid fever and exhaustion from sup-puration.

The army and navy continue to have a fair representation in the record, eleven being in the different branches of the former and eighteen in those of the latter service.

The various occupations of those reported to be employed are as follows :—

Actor	1	<i>Brought forward</i>	239
Agent (baggage)	1	Conductor	3
“ (insurance)	2	Confectioner	3
